Scheduling Outages

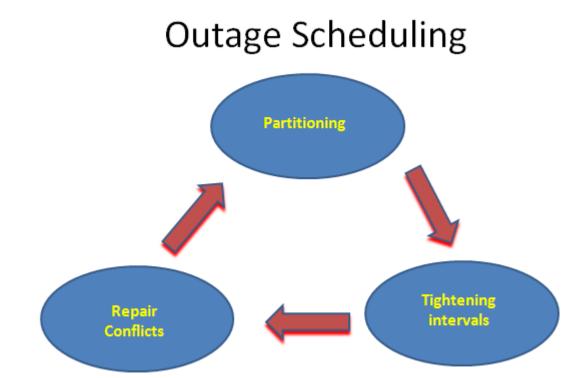

Planning Power Production

Conclusions

- power plants: type1 and type2
- type1 plants: expensive
- type2 plants: cheap but exhaustive
- energy demand scenarios
- type2 plants: outages with constraints
- satisfy demand by maximum use of type2 plants

Scheduling Outages

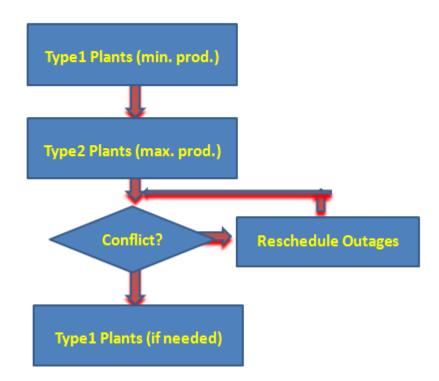

/ department of mathematics and computer science

Murat Firat, 13 July 2010

Planning Power Production

Power Assignment

/ department of mathematics and computer science

Murat Firat, 13 July 2010

e Universiteit

Conclusions

Summary:

- one month concentrated work
- implementation in Java
- Solutions of 5 A instances are obtained
- Qualified by jury decision (4 solutions accepted)

Thanks for attention!
